

# The 30th Annual CCSC Eastern Regional Conference

*Computing Education: Building a Community*

**November 14th and 15th, 2014: York College of Pennsylvania, York, Pennsylvania**

*Presented by the Consortium for Computing Sciences in Colleges  
and the Computer Science and Computer Engineering Programs, York College of Pennsylvania*

The 30th Annual CCSC Eastern Regional Conference will be held on the campus of York College of Pennsylvania.

York College is a small (4500+ students) comprehensive college located in York, Pennsylvania, a short trip from the Baltimore/Washington D.C. and Philadelphia metro areas, and a few hours from the New York metro area.

The 2014 CCSC Eastern Conference is designed to promote the exchange of information among educators at all levels of the computing sciences. The conference spans all computing disciplines, including computer science, computational science, information systems, information technology, and beyond, and provides an affordable regional forum for the exchange of ideas and information concerning computing and computing curricula.

*The Kinsley Engineering Center*

The CCSC Eastern Conference welcomes scholarly papers, presentations, workshops, posters, and panels on all areas of computing. We especially invite submissions that are of interest to undergraduate students and submissions on the content, structure, delivery, support, and application context of all areas of computing education.

The conference will include workshops, invited speakers, tutorials, panels, lightning talks, and paper sessions. Two exciting activities are planned for students: (a) a student poster session where undergraduate and graduate students will have the opportunity to present research projects on any topic of the computing sciences; and (b) a student team programming competition. Both the student poster session and programming competition will award prizes.

Based on this year's theme, *Building a Community*, we especially encourage submissions related to sharing innovative curriculum materials and pedagogical approaches across institutions and academic programs. However, we welcome submissions related to all areas of computing education.

**Conference co-chairs:** David Babcock (York College of Pennsylvania, [dbabcock@ycp.edu](mailto:dbabcock@ycp.edu))  
David Hovemeyer (York College of Pennsylvania, [dhovemey@ycp.edu](mailto:dhovemey@ycp.edu))  
Greg Link (York College of Pennsylvania, [glink@ycp.edu](mailto:glink@ycp.edu))  
James Moscola (York College of Pennsylvania, [jmoscola@ycp.edu](mailto:jmoscola@ycp.edu))

**Conference website:** <http://www.ccsc-eastern.org>

**Submission deadline:** April 18, 2014
